

KNOLL transport systems are ideally suited for use in logistics and assembly, even for heavy and very large parts. Because our systems are modularly structured mechanically, electrically, and in terms of their software, our specialists can implement custom-tailored solutions for you. Such systems guarantee a short amortization time and can be expanded nearly at will. The input-side visualization of the controller makes for easy operation.

Whether for synchronized or continuously flowing assembly – we will design the right system for you. Here, we emphasize top-flight ergonomics and assembly „at eye level.“ For logistics applications, we prefer to use standard conveyor technology that can be designed so that it is cost-effective and reliable. Customer-specific solutions can be built from the existing building blocks on request. Even long lines are possible.

## Drag chain conveyor TS-Z

### Technical data TS-Z\*

Height	60 mm
Width	314 – 530 mm
Speed	0.25 – 6 m/min
Chain type	Hollow pin chain
Transport medium	Trolley

### Function units

Conveyor
Head drive
Intermediate drive (Master and Slave)
Cleaning unit
Seperating stopps (Stop-and-go)
Carrier unit
Customized units on request

### Attachments

Platform
Cable duct
Bumper
Cover
Customized lateral guidance
Pillar for control devices
Up and down ramps

\* Z = ground chain
