Transport system
TS-S-B/TS-G-B (System close to ground)

KNOLL
.It works

Issue 08-2019

KNOLL transport systems are ideally suited for use in logistics and assembly, even for heavy and very large parts. Because our systems are modularly structured mechanically, electrically, and in terms of their software, our specialists can implement custom-tailored solutions for you. Such systems guarantee a short amortization time and can be expanded nearly at will. The input-side visualization of the controller makes for easy operation.

Whether for synchronized or continuously flowing assembly – we will design the right system for you. Here, we emphasize top-flight ergonomics and assembly „at eye level.“ Low-building conveyor systems contribute to this, as do additional platforms and lifting units. Turning and/or swiveling workpiece holders ensure perfect accessibility to the object.

Chain conveyor TS-S-B / TS-G-B

Technical data TS-S-B/TS-G-B*

Height	230 – 300 mm
Width	560 – 1,400 mm
Speed	0.25 – 18 m/min
Chain type	Accumulation chain, roller chain
Transport medium	Trolley, workpiece carrier, special carrier

Function units	Attachments
Conveyor	Platform
Turning station	Cover
90° transfer	Customized lateral guidance
Transfer car	Pillar for control devices
Indexing unit	Up and down ramps
Lifting unit	
Scissor lift	
Separating stopps (Stop-and-go)	
Customized units on request	

*B = close to ground
