# HydroPur

## HydroPur – as individual as your company

Have you special requirements when it comes to grinding? We have the solution: Our new HydroPur filter system. It is configured according to your requirements and installed quickly. With the modern SmartConnect control, you can easily operate and monitor the HydroPur. In this way, you have all relevant data at a glance.

### The HydroPur in action

"As a demanding premium customer, we attach great importance to quality and user-friendliness. KNOLL has been able to meet these requirements to the fullest extent. Thanks to the modular design of the HydroPur, we were also able to adapt the system precisely to our needs."

Magnus Strobel, RÖHM GmbH

## Basic equipment or the full version?

You have a choice. The special feature of the KNOLL HydroPur filter system is its standardized design. This reduces the delivery time and you receive a favourable price-performance ratio.

Experience the HydroPur.
