

TS

Transport system TS-Z (Ground chain)

KNOLL
.It works

Version 05-2018

KNOLL transport systems are ideally suited for use in logistics and assembly, even for heavy and very large parts. Because our systems are modularly structured mechanically, electrically, and in terms of their software, our specialists can implement custom-tailored solutions for you. Such systems guarantee a short amortization time and can be expanded nearly at will. The input-side visualization of the controller makes for easy operation.

Whether for synchronized or continuously flowing assembly – we will design the right system for you. Here, we emphasize top-flight ergonomics and assembly „at eye level.“ For logistics applications, we prefer to use standard conveyor technology that can be designed so that it is cost-effective and reliable. Customer-specific solutions can be built from the existing building blocks on request. Even long lines are possible.

TS

Drag chain conveyer TS-Z

Technical data TS-Z*

Height	60 mm
Width	314 – 530 mm
Speed	0.25 – 6 m/min
Chain type	Hollow pin chain
Transport medium	Trolley

Function units	Attachments
Conveyor	Platform
Head drive	Cable duct
Intermediate drive (Master and Slave)	Bumper
Cleaning unit	Cover
Seperating stopps (Stop-and-go)	Customized lateral guidance
Carrier unit	Pillar for control devices
Customized units on request	Up and down ramps

* Z = ground chain
