

YOUR BENEFITS

Flexible concentration

Individual settings for each system

Automatic, precise mixing

The concentrate and water are provided directly as a ready-to-use emulsion

Universally applicable

Compatible with all water-miscible cooling lubricants

Material-independent

For all materials and machining processes

High operational reliability

Decentralized system architecture: Malfunctions in individual units do not affect the overall system

Compact design

Space-saving and flexibly integrable

Industrial-grade design

Over 50 years of experience in mechanical engineering - developed for rugged 24/7 operation

Automatic sensor flushing

Automatic cleaning of the sensor system with each supplementary dosing

ControlLube

**EVERYTHING
IS UNDER
CONTROL**

Uninterrupted production:

Keeping an eye on the cooling lubricant. Automatically regulated.
